Pray for Bangladesh after reports of the worst floods in years

Bangladesh is reportedly experiencing its worst flooding in years, with tens of thousands of people having been displaced. Bangladesh’s monsoon season can often pose a flood risk to the low-lying country, where heavy rains see rivers swelling to dangerous levels. The erosion and bursting of riverbanks in recent weeks, coupled with adverse landslides, have left an estimated 4 million people at risk of food insecurity and disease.

Please pray with us for Bangladesh. Pray for:

• Bangladeshi communities in danger or at risk of disease because of flooding, that they would be kept safe.
• Those who are hungry, that food would be provided. Pray especially for those receiving food through the BMS grant, that it would reach those who need it most.
• Peter and Louise Lynch, the BBCS, and the pastors who have been able to help families after the floods. Give thanks for their generous hearts, and pray for wisdom and strength to know how to best help those in need.

About BMS World Mission

BMS supports work in development, education, church and leadership in Bangladesh. BMS is currently involved in preschool education projects, evangelism and engineering work in the country.

BMS is able to keep responding to disasters around the world because of generous giving from UK Christians. To give to our disaster recovery fund, go online at www.bmsworldmission.org/disaster-recovery
