Coronavirus outbreak: Pray for China

Urgent prayer needed in the wake of a global health emergency.

A global health emergency has been declared by the World Health Organisation as the coronavirus spreads across China and other parts of the world. Please pray for China, and other countries affected by the coronavirus outbreak.

At least 213 people have died and almost 10,000 cases have been recorded nationally, after confirmation yesterday that the virus had spread to every region in China.

There have been 98 cases of the virus recorded in 18 other countries and two cases confirmed in the UK as of 31 January, but there have been no deaths outside of China.

The city of Wuhan, where the virus is thought to have initially broken out, was put under effective quarantine on January 23, two weeks after the new virus was identified.

Please pray for China, and for the other countries affected by this virus. Pray for God’s hand of protection over all doctors and nurses, governments and health authorities working across the world to stop the spread of the coronavirus.

Pray for China

- Pray for healing for those currently affected by the virus, that they would respond well to treatment and that they would recover quickly.

- Pray for all those being kept under quarantine across the world. Pray that no symptoms will appear, and that God would bring them peace until they can return home.

- Pray for the medical workers across the world fighting this virus. Pray that they would remain safe and strong while they carry out this vital work.

- Pray for China. Pray that God will protect this nation and stop the virus spreading further.

- Pray for authority figures working to combat the spread of the virus. Pray that they will be wise, and that their efforts will be fruitful.
